

DNA Marker & Parent Verification Test Order Form

Heritage Horse International provides parentage verification DNA testing through UC Davis of California. Completion of the test is simple and only requires a 30 to 40 hairs to be removed, **by the roots**, from the mane or tail of the horse. For young foals get sample from the tail. The DNA is extracted from the roots of the hair. After testing is completed, the results will be returned to HH and we will then provide you with a copy of the results for your records.

*To order a test: Send completed form and \$40.00 (U.S. Dollars)
 Made payable to Heritage Horse International
 Mail to: Heritage Horse International, 1266 150th Avenue, Ogilvie, MN 56358.*

All owners are strongly encouraged to DNA test their horses of Friesian ancestry (and you may also test non-Friesian parents, if you wish), but it is not required for all horses at this time. When a horse does not have DNA on file, "NOF" will be written on their papers to indicate that DNA testing has not been done on that particular horse. All horses of Friesian ancestry, who are registered with HH, must have DNA on file (with HH) before their offspring can be registered with HH. DNA testing is required for all horses applying for Heritage Warmblood registration. If your horse is already DNA tested through UC Davis, either individually or with another registry, then there is no need to re-test the horse, as long as you can provide the UC Davis case number and a copy of the DNA report to Heritage Horse.
